Overview

With Oracle Cloud Office, organizations and individuals can boost their productivity with a fully featured web-based office suite. Seamlessly integrated with Open Office, it delivers the first open standard office suite for Windows, Mac OS, Linux, Web and mobile phones.

Team Collaboration, Web 2.0 Publishing, Mobile Access

Oracle Cloud Office is designed to address the office productivity needs of today's knowledge worker—easy to use via browser, open for web 2.0–style collaboration, and secure via enterprise on-premise deployment.

- **Web Presentations:** give synchronous web presentations from your browser, without the high costs and feature overhead of third-party software
- **Remote Teamwork:** provide agenda, live joint presentation viewing, and meeting minutes online to a remote team during conference calls
- **Mobile Office:** enable mobile access to all documents in their latest version, plus convenient asynchronous collaboration with sticky notes in ODF format
- **Web/Enterprise 2.0 Publishing:** publish and embed documents in blogs, wikis, or intranets—your changes will be kept up-to-date with no need for time-consuming re-distribution of updated versions via e-mail

Customer Benefits

The Oracle Office product family – comprised of Open Office and Cloud Office - is the foundation of an open standard office stack that significantly lowers IT costs. Oracle Cloud Office's innovative web 2.0 approach enhances productivity by enabling easy, document-oriented collaboration. The seamless integration with Oracle Open Office ensures complex offline document editing, and the compatibility with Microsoft file formats and PDF make it ideal for cross-company and external collaboration. The open standard and multi-platform approach enables a more flexible and sustainable IT infrastructure.

Frequently Asked Questions

GENERAL INFORMATION

What is Oracle Cloud Office?

Oracle Cloud Office is a web-based office suite that includes text, spreadsheet, presentation, and virtual desktop tools for document viewing, editing, in-document collaboration, web 2.0 publishing, and mobile access.

What is the difference between Oracle Cloud Office, Oracle Open Office, and OpenOffice.org?

Oracle Open Office is an open standard desktop office suite for the enterprise featuring Oracle Application integration, professional deployment tools, and global support. OpenOffice.org is the community edition and the #1 free open source productivity suite with more than 100 million users, supported by its main contributor, Oracle. Oracle Cloud Office is the new web and mobile office suite with seamless integration into Open Office. All three products are based on the Open Document Format (ODF) ISO Standard as the core file format.

Will Oracle Cloud Office be available as service for home users or small-business customers?

Oracle Cloud Office is available for telco and ISP customers and partners, who will provide software-as-a-service office productivity to home users and midsize business customers.

Does Oracle Cloud Office overlap with Oracle's others collaboration products?

No. The focus of Oracle Cloud Office focus is on personal productivity, in-document team collaboration, and web-based workflow tools. It is interoperable with Oracle Fusion Middleware, Oracle Enterprise Content Management Suite, Oracle Unified Communications Suite, and Oracle Beehive e-mail and calendaring products via standard interfaces.

Where can I find more information about Oracle Cloud Office?

Go to oracle.com/office for more product information and to keep in touch on latest news via blogs.oracle.com/office and twitter.com/oracleoffice
