

## Data sheet:

# MadeToTag Automate

**MadeToTag Automate** is a plug-in for Adobe InDesign Server that enables the automated export of prepared InDesign documents as accessible, compliant PDF/UA files. – Designed for integration into workflow processes that require high-volume output of legally compliant PDF documents and a centralized export process.

### Use Cases

- Process-driven workflows
- Template-based document creation
- Centralized server infrastructures
- High-volume production of accessible PDF documents

### Key Features

- Automated export to tagged PDF compliant with the PDF/UA ISO standard
- Support for InDesign documents and books
- Centralized, server-based output
- Support for multiple Adobe InDesign Server instances
- Table tagging via scripting
- Export to PDF/A-2a (accessible PDF for long-term archiving with tagged content)

### For Integration with

- Adobe InDesign Server
- MadeToPrint Server
- Enfocus Switch
- Script-based workflows
- Custom workflow and publishing systems

### Requirements

- Adobe InDesign Server (macOS oder Windows)
- Prepared InDesign documents (optionally optimized for PDF/UA with **MadeToTag Desktop**)
