

# BrailleProof™

Braille Inspection

## Fast Braille packaging inspection

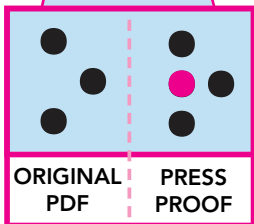

Digitally inspect and translate Braille components  
for added or missing dots

## Detect every dot

BrailleProof is a Braille inspection and Braille verification tool that digitally inspects Braille text for added or missing Braille components, to ensure that the Braille matches the approved PDF.

BrailleProof also translates Braille components into readable text.

## Benefits:

- > Guarantees your PDF matches the printed Braille component
- > Meets all Braille standards for pharmaceutical and healthcare Braille packaging, including the Marburg Medium
- > Ensures Braille content, layout and placement on packaging is correct
- > Achieves 100% presence verification

## Features:

- > Detects missing or added Braille dots
- > Translates Braille during inspection into readable text
- > Measures Braille dot spacing
- > Braille character recognition
- > Extensive reporting, detailing pass/fail for each Braille dot
- > Color coding allows for easy analysis of flawed dots
- > 21 CFR Part 11 / EMA Annex 11 compliant
- > Validation available
- > Integrates with ArtProof artwork inspection software
