

Scan360TM

Cylinder Scanner

Eliminate errors found
on cylindrical packaging
components

The first cylinder & bottle inspection tool

Designed for the consumer packaged goods (CPG) and pharmaceutical markets, Scan360 will directly scan the surface of any cylindrical item and automatically compare it to the approved proof.

Scan and inspect with great accuracy:

- > Large heavy gauge metal cans
- > Ribbed cans
- > Embossed text
- > Rough textured plastic finishes
- > Shrink wrapped cylindrical items
- > Aluminum cans
- > Glass jars
- > Plastic bottles
- > Soft metallic containers
- > Polymer tubes

Features:

- > Detects missing, added or broken elements
- > Detects print defects
- > Scans in under 20 seconds
- > Inspects cylindrical diameters from 1"(25.4mm) – 6.8"(172.72mm)
- > Resolution: 300 dpi

Benefits:

- > Ensures the print quality on your cylindrical packaging
- > Automates your inspections
